

Announcing:

2013 CQ DX Marathon

2012 Logs Due by January 15, 2012

This year's DX Marathon ends December 31, so it's time to go back through your log, see what you have worked, enter it onto the DX Marathon spreadsheet, and then update it with any additional contacts through the end of the year. See the main text or the DX Marathon website for details on how and where to submit your log. Remember, log submission deadline for the 2012 CQ DX Marathon is January 15, 2013.

The 2013 edition of the CQ DX Marathon begins at 0000 UTC on January 1, 2013 and runs through 2359 UTC on December 31, 2013. The goal, as always, is to work as many countries and CQ zones as possible at least once during the calendar year. There are no significant changes to the rules this year, but some clarifications have been added for Formula Class antennas in the Appendix. **Changes are highlighted in bold type.** We will continue to use a downloadable Microsoft Excel® sheet which can be used throughout the year to track your progress and then emailed at the end as your submission—no extra forms required! Many programs are now available to automatically populate the sheet from your logging program. See the DX Marathon website for details. Here are the 2013 rules for the CQ DX Marathon:

Rules, 2013 CQ DX Marathon

Activity period: The CQ DX Marathon is a year-long activity, beginning at 0000 UTC January 1 and ending at 2359 UTC December 31. Each year's event is separate.

Frequencies: Any authorized amateur frequency may be used. Contacts through repeaters or satellites are not allowed for credit, nor are contacts with maritime or aeronautical mobile stations. All contacts must be made entirely over amateur radio frequencies – i.e., Echolink-type contacts do not count.

Modes: Any authorized amateur mode may be used, but three modes will be recognized in the DX Marathon—CW, Phone and Digital. All modes other than CW or voice modes will count as Digital.

Categories: Each entrant in the DX Marathon may submit one log each year per operating location. Participants submitting logs for single mode or single band entries must include only those contacts. Logs submitted with multiple mode or multiple bands will not be considered for mode and band awards. Entries with two or more callsigns will only count as a single entry if all contacts were made by the same (single) operator at the same station using the same antennas. Entries that include contacts made with the assistance of remote receivers and/or transmitters in addition to contacts from a primary station are not permitted. There are two entry classes, "Formula" and "Unlimited."

Formula: An entrant may choose one of two options in this class: (1) All contacts must be made with a maximum output power of 10 watts, regardless of band or mode; or (2) the operator may run a maximum of 100 watts output to a simple antenna, such as a vertical or dipole (see the appendix below for further rules on antennas used in either option for Formula class). An operator in Formula class must select

QRP (10 watts or less) or 100 watts and limited antennas at the beginning of the year's DX Marathon, and may not switch between entry modes during the year. All contacts must be made without assistance of any sort, including but not limited to lists, passes, or use of higher power or prohibited antennas to initially secure the contact. Use of spotting nets such as a DX Cluster® is allowed.

Unlimited: Any antenna may be used, along with any power level for which the operator is licensed. Use of spotting nets such as DX Cluster® is allowed.

Scoring: Each country worked is worth one point. Each CQ zone worked is worth one point. The total score is the sum of zones and countries worked, on any mode and any authorized band. There are no multipliers of any kind. Each country and zone count only once. A single QSO may count for both a country and a zone. If in the course of the year you work 238 countries and 37 zones, your score is 275. If you work all 40 zones and 150 countries, your score is 190. The CQ DX Countries List and the CQ Zone List constitute the official lists. The lists are available on the DX Marathon web site. In the case of ties, the operator whose last scoring contact was earlier chronologically will be judged the winner. Decisions of the Marathon Manager are final.

Submissions: Submissions must be made electronically, via e-mail to <scores@dxmarathon.com>. A Microsoft Excel® template into which contacts may be entered is available for download from the CQ DX Marathon website at <<http://www.dxmarathon.com>>. The website also provides other options for those without access to Excel®. **All scores must be received by January 10 following the close of each DX Marathon.**

Verification: QSLs are not required. The operator is expected to claim contacts only from stations the operator has every reason to believe are legitimate, and only to claim contacts in which an accurate two-way exchange was clearly accomplished (see Appendix for further explanation). Scores will be adjusted by the DX Marathon committee for claimed contacts with pirates or any station not considered legitimate. Submissions may be penalized or voided in cases of fraud or poor sportsmanship. Submissions that do not provide detailed descriptions of Formula class antennas (type, height and length, for example) to clearly demonstrate that the antennas meet the rules and the intent of Formula Class may be re-classified to Unlimited class. Decisions of the Marathon Manager are final.

Clubs: Clubs are strongly encouraged to use the framework of this contest for intramural and regional competitions.

Results: The final listing of official scores and winners will be published in CQ Magazine. The scores will also be posted on the DX Marathon website approximately one month after the results are published in CQ magazine.

Awards:

Plaques: The CQ DX Marathon Committee will award plaques as follows: Highest overall score in Unlimited Class; Highest overall score in Formula Class; Highest overall CW, Highest overall SSB and Highest overall Digital only scores; Highest overall score for each of the 6 Continents; Highest overall score for single band entries for the 10, 12, 15, 17,

20, 30, 40 and 80m bands. Plaques for CW, SSB, Continent and Band winners are awarded regardless of Class and will only be awarded if the winning scores in those categories are at least 50% of the score of the overall DX Marathon Unlimited Class winner. Entrants may receive only one plaque per year. In the case of a participant qualifying for more than one plaque, that participant will receive a plaque for the highest level based on the above order.

Certificates: Certificates are awarded to qualified participants in this order: Highest overall score in each CQ Zone; Highest overall score in each Country; Highest overall score in the Formula Class 10 watts or less option. Plaque winners are not eligible for certificates. Only one certificate will be awarded per entrant. In the case of a participant qualifying for more than one certificate, that participant will receive a certificate for the highest level based on the above order.

In all cases, the rulings of the CQ DX Marathon Manager are final.

APPENDIX

Formula Class antennas, option 1: Operators selecting the 10 watt option are limited to antennas on a single tower and whose height does not exceed 65 feet or 20 meters above ground elevation within 330 feet or 100 meters of the tower base. Wire antennas may also be used but must meet the criteria of the 100 watt option, and may be tower-supported at only one point.

Formula Class antennas, option 2: Antennas for operators choosing the 100 watt option must be either simple verticals or wire antennas lacking significant gain. No arrays are allowed, whether vertical or horizontal. **Wire antennas, regardless of type, may not exceed 130 feet or 40 meters in length, may not be higher than 65 feet or 20 meters above ground at any point of the antenna and may be tower supported at only one point. The tallest point of vertical antennas used may not be higher than 65 feet or 20 meters above ground.** Yagis, quads and rotatable dipoles may not be used in this category. There is no limit on the number of antennas that can be used as long as each antenna meets the above criteria.

Contacts: Each contact for a claimed country or zone must be a solid contact. The station claiming a contact with another station is expected to have had his or her callsign fully and accurately received and transmitted by the other

station, and to have copied his/her own call being correctly sent by the other station. For example, K2MGA may not claim credit for a QSO with a DX station who had his call as K3MGA, even though in many cases the DX station

would QSL the contact with the correction made (after receiving a card from K2MGA, realizing the error and correcting his/her log). For a contact to count, both stations must correctly copy all of both callsigns.

Thanks to our Plaque Sponsors!

Our thanks and appreciation to the plaque sponsors:

Top Unlimited Class score: Northern Illinois DX Association
 Top Formula Class score: Northern Illinois DX Association
 Top CW only score: Bencher, Inc.
 Top SSB only score: Collins Amateur Radio Club in Memory of Art Collins, W0CXX
 Top Digital only score: NN6NN RTTY Team
 Top Single band scores (10, 12, 15, 17, 20, 30, 40, 80): Araucaria DX Group.
 Top Continental scores: Sponsor wishes to remain anonymous.

Additional plaque sponsorships are available. If you or your club would like to sponsor a plaque, please contact the DX Marathon administrator, John Sweeney, K9EL, via <info@dxmarathon.com>.

RF Amplifiers, RF Transistors, Chip Caps, Metal Clad Micacs & Hard to Find Parts

In Business For 32 Years

HF Amplifiers

PC board and complete parts list for HF amplifiers described in the Motorola Application Notes and Engineering Bulletins:

AN779H (20W)	AN758 (300W)
AN791L (20W)	AR313 (300W)
AN752 (140W)	EB27A (300W)
EB63 (140W)	EB104 (600W)
AR305 (300W)	AR347 (1000W)

Low Pass Harmonic Filters 2 to 30MHz

HF Broadband RF Transformers 2 to 30MHz

RF Transformers 2 to 300MHz Type "U"
